The Department earnestly requests all users to treat the charging equipment with utmost care and respect. We emphasize that instances of vandalism or intentional damage to these facilities will be taken seriously and reported to the appropriate law enforcement agencies. The success of our electric vehicle initiative hinges on a collaborative effort between the government and the public. We strongly believe that shared responsibility in maintaining and protecting these charging stations is crucial for the long-term success of EV adoption in our nation.

For any complaints, kindly contact the BPC ESD offices in your respective Dzongkhags. We thank you for your support.
